I'm a backend developer with 1.5 years of commercial experience. I've worked on small and medium-scale solutions, mostly developing backends and Telegram bots. I enjoy learning new skills and troubleshooting complex problems. I always stay focused on goals and code style.

My primary stack is FastAPI + PostgreSQL, but I have also developed some frontend projects with Vue.js and often used other databases in backend development.

Skills

Python Html/CSS Javascript SQL

Backend	Frontend	Databases	CI/CD
■ Flask	■ Vuetify	■ MongoDB	■ Git
■ FastAPI	■ Vuex	■ MySQL	■ Docker
■ aiogram	■ Vue.js	■ PostgreSQL	
■ SQLAlchemy	■ Nuxt.js	■ Firebase	
	■ Node.js	■ Redis	

Experience

Freelance **May 2022** ~3 years
[\[Link\]](#) [\[Portfolio\]](#)

Hypefood [\[Website\]](#) [\[Tg bot\]](#) December 2022 - May 2024 (1.5 years)
FastAPI, Docker, RabbitMQ, Redis, PostgreSQL, aiogram, ELK
It's a big online food delivery website. It uses many technologies and APIs, such as liqpay, checkbox, iiko, omniceLL, and kyivstar. I solved many problems with pushing online updates, caching, and customer loyalty systems. In this project, I worked only on the backend part and telegram bot. Developed all core backend for this project, maintained it, and developed new features.

Projects

NotesAPP [\[Github\]](#) [\[API\]](#) March 2022
Nuxt.js, Fastify, MongoDB
A lightweight Notion alternative

Moonlist [\[Webarchive\]](#) February 2021 - October 2021 (~7 months)
Nuxt.js, FastAPI, PostgreSQL, Discord.py, Mkdocs
It's a discord bots monitoring. The project consists of 4 modules: Moonlist Brain(Discord bot), Moonlist Brain(Website for bot), Moonlist API, Moonlist
