ABOUT ME

Backend developer with 2 years of professional experience building production backends and automation tools. Picked up a complex domain at Hypefood quickly, eventually maintaining the core backend for 500+ daily orders across multiple franchise locations. I care about clean code, good architecture, and solving problems thoroughly

EDUCATION

Bachelor of Computer Science

Slovak Technical University · FIIT
2024 – now

- Received Dean's Scholarship for academic excellence.

SKILLS

Languages: Python, JS/TS, SQL, Java, Rust, C

AI Assisted Development:
Claude Code, Github Copilot

Backend

- FastAPI
- Flask
- aiogram
- SQLAlchemy
- Node.js
- RabbitMQ
- Nats
- pytest

Infrastructure

- Docker
- Git
- AWS
- ELK
- GH Actions
- Nginx

Databases

- PostgreSQL
- MySQL
- MongoDB
- Redis
- Firebase

Frontend:

- Vue.js
- Nuxt.js
- Vuex
- Pinia
- Tailwind

EXPERIENCE

Python Developer

2025 – 2026

Automation Aspects

FastAPI, PostgreSQL, Python, aiogram, Redis

- Independently scoped and delivered full-cycle projects for small business clients, including backend APIs, Telegram bots, automation tools, and full-stack websites.

Backend Developer

Dec 2022 – Jan 2025

Hypefood

FastAPI, PostgreSQL, Redis, RabbitMQ, Docker, AWS, ELK

- Backend developer in a cross-functional product team for a large-scale food delivery platform. Designed and maintained the core backend architecture for a food delivery platform handling 500+ daily orders across multiple franchise locations, integrated third-party services including LiqPay (payments), Checkbox (fiscalization), iiko (POS system), Omnicell, and Kyivstar. Built and maintained a Telegram bot for order management
 - Implemented caching layer, reducing response times by ~40%
 - Developed a customer loyalty system
 - Solved real-time order update delivery challenges

PROJECTS

Kupio Backend

Mar 2026 – now

FastAPI, PostgreSQL, Redis, Stripe, WebSocket, S3, Docker

- Collaborated in a team to build a production-ready backend for a marketplace platform: JWT authentication, Stripe checkout with webhooks, real-time WebSocket chat, FCM push notifications, and S3 image uploads

Moonlist

Feb 2021 – Oct 2021

Nuxt.js, FastAPI, PostgreSQL, Discord.py, MkDocs

- Discord bots listing platform built across 3 modules: a Discord bot (Moonlist Brain), a REST API, and a public website.
 - Shipped to real users with public-facing documentation built with MkDocs. Built and maintained all modules independently

LANGUAGE

- English B2
- Slovak B2
- Ukrainian
